# HAS ANYONE EVER CALLED YOU FANTABULOUS: Fashion TIPS from designer Esther Nash

**Time to clean your closet out again. Specifically, let's get rid of those old jackets that have lost their spunk and style. Now you can make your fantasy jacket a reality. Poof the Magic Starts!**

## Step 1

Be sure to work in a large space with cross ventilation. To start, cover your work area with newspaper and wear your gloves. Place the jacket on a flat, clean surface. Now it is time to draw your design. Draw first with pencil and then trace over with marker after you are sure of your design.

## Step 2

Now, if you want people to admire you as an artist—one. Create your own design with some paint and brushes and you will be the artistic individual everyone will admire.

## Step 3

Leave your jacket to air dry completely. Pin on safety pins and antique pins in just the right places. I suggest the collar and cuffs of the jacket.

**Now you are ready for that art gallery opening and then the theater, but first you need these finishing touches by fashion designer Esther Nash:**

- copper topper beret and garter
- unique pair of earrings/sequin anklet
- sequin hipster Minnie
