"TIE UP" YOUR HOLIDAY SEASON

Fashion TIPS from Designer Esther Nash

Want new ways to liven up those old ties in your closet?
Cast off that stamped-out look and take your style to new limits.

Essential items needed to start:

- 1) One tie any color, any fabric will do
- 2) Safety Pins
- 3) Buttons
- 4) Paint, oil based only
- 5) Scissors

Step 1

Take your tie and lay it flat on a clean space to work on.

Step 2

You can either draw out a pattern to follow or just work free hand.

Step 3

Now take safety pins and pin on to tie to make any design you find pleasing to the eye.

Step 4

Take your buttons and pin on to tie. Be creative. If painting, remember to wear gloves and put newspapers down so you don't ruin floors or furniture during the creative spurt.

If you don't want a long tie, you can cut it for individuality.

You are not getting any younger. It is now or never. So... before that sand runs out you might as well be known as an unforgettable legend and go down in fashion history with the aid of designer Esther Nash.

The stars will be out tonight and you will soon be one of them.
